

IN THE ABSTRACT:

Cancel the present Abstract and add as follows:

5 --An apparatus for determining performance-indicating numbers in sports games, particularly in ice hockey, includes a database having sports games box scores stored therein. The database is stored in a tangible electronic media, such as magnetic media, optical media, electronic
10 media, paper, thermosetting polymers, rubber, metals, or other suitable storage media. Such media includes computer diskettes, magnetic tape, optical disks, random access memory, read only memory, computer punch cards, and other volatile, temporary, and/or permanent memory devices. The
15 database scores box scores, such as start time, stop time, team 1 goals and time of goals, team 1 goalies A and B goals and power plays, and team 2 goalies A and B goals and power plays. The performance indicating statistics can be electronically displayed after a game or during a game on
20 the aforesaid tangible media, which may include among others, a video split screen display during the course of a game, a sports arena electronic scoreboard, or on any other video display, such as a global communications network or a television show.--
